I think Stu is still too hung up on droplet drift. Giles work is focused on fluid dynamics and aerosols. I think the Gee's are going to detect zero.

Richard Kauffman FYI, CAPT Richard R. Kauffman, M.S. Senior R...

Capt. Kauffman,

We will be targeting the products we expect will be utilized and are traditional selections for the timber companies. When I have them set up and running we'll be in touch, but welcome all input. Dr. Ken Giles of UCD will provide some expertise, we will follow his experienced guidance overall for the project.

Best Regards,

Stu Turner, CPAg

Maya,

Would you be willing to share your sampling plan? It would be helpful to know which herbicides you are targeting, how long the sampling devices will be deployed, and what method the lab is going to run to analyze the samples.

Richard

Thank you Richard!

We are welcoming all inquiries, tips, guidance from EPA's team.
We are very open to your involvement to what ever degree you wish

All of the equipment has arrived and we are getting the schedule set up with Stu Turner, who is setting the air samplers up for us.
At this point it looks like they will be set up next week.
Please include him in the conversation as well.
Thanks again,
Maya
